github.com/Bob0706

PROFILE

Full-stack developer focused on FinTech, building trading, analytics and blockchain-verified platforms for Indian markets from the database up to the UI. A confident, hard-working team leader who has managed volunteer teams at hackathons, and someone who believes in continuous learning and in exploring new ventures.

EXPERIENCE

Python Developer Intern · Gatha Technologies — 2025

- Built Python scripts and REST API endpoints for the company's projects, with SQL queries for data handling.
- Fixed bugs and tested production code in an Agile team, using Git for version control and code reviews.

Database Operations · PCPS Samaj App — Community project

- Managed the member app's database: adding and updating records, writing report queries, and keeping data clean, consistent and backed up.

Volunteer & Team Lead · Hackathons — Leadership

- Led volunteer teams at college and inter-college hackathons, handling registrations, logistics and participant support.

PROJECTS

AlgoLearn India — Algorithmic Trading Learning Platform — github.com/Bob0706/algolearn

Next.js · React · TypeScript · Python · Solidity · Hyperledger Besu · ethers.js · Gemini API · Docker

- Turns plain-English trading strategies into Python code (Gemini, plus a rule-based parser fallback) and backtests them on live NSE/BSE data for every listed company.
- Built a sandboxed Python backtesting engine with next-bar fills, Indian charges (STT, stamp duty, GST), slippage, a buy-and-hold benchmark and automatic look-ahead-bias detection.
- Records every strategy, backtest and signal on a Hyperledger Besu blockchain through a Solidity contract, with downloadable proof bundles and a ledger-backed leaderboard.

TradeChain India — Financial Trading Terminal — Private repository

React 19 · TypeScript · Vite · Tailwind CSS · Firebase · Express · Gemini API

- Paper-trading terminal for Indian equities, with an order-matching engine, historical market replay and portfolio and order tracking.
- Adds AI research and an AI tutor, a learning academy with quizzes and badges, a community leaderboard and blockchain-style trade provenance.

Transrec Asset Management System

Python · Flask · MySQL

- Monitors the health and lifecycle of industrial machines.

PicHub — Thumbnail Marketplace

Python · Flask · SQLAlchemy · MySQL

- Thumbnail management system and marketplace where designers post their work.

API-Documentor

Node.js · Express · MongoDB · REST

- Generates API documentation in plain, readable language tailored to the reader's profession, with auth, documentation and API-testing endpoints.

SKILLS

Languages	Python, JavaScript, TypeScript, SQL, Solidity, HTML, CSS
Frontend	React, Next.js, Vite, Tailwind CSS, Framer Motion
Backend	Flask, Node.js, Express, REST APIs
Databases	MySQL, MongoDB, Firebase / Firestore, SQLAlchemy
Blockchain & AI	Hyperledger Besu, ethers.js, smart contracts, Google Gemini API
Tools	Git, GitHub, Docker, Vitest, pytest, Render

EDUCATION

B.Tech, Computer Science & Engineering · Pimpri Chinchwad University — 2025 – Present

Diploma, Information Technology · Pimpri Chinchwad Polytechnic — 2022 – 2025
